## Skills

Spring Boot

Hibernate

## Projects

### Customer Enquiry Details(CRUD)

Jan, 2022 - Jan, 2022

Java

- Developed a console application in Java for Sharptronics Home Appliances to handle customer enquiries and billing follow-up.
- Implemented CRUD operations to manage customer data.
- **Increased efficiency** by automating the customer enquiry and billing process.
- **Reduced manual errors** by implementing data validation and error handling mechanisms.
- **Improved customer satisfaction** by providing quick and accurate responses to customer enquiries.

### Digital Card Website

Aug, 2023 - Nov, 2023

HTML5

CSS3

Bootstrap5

JavaScript

JQuery

PHP

Laravel

MySQL

- **Developed** the front end of the digital card platform to offer a visually stunning and user-friendly interface.
- Ensured a **seamless experience** on various devices through the implementation of modern and responsive design.
- **Improved** user engagement by creating an intuitive and visually appealing interface.
- **Enhanced** accessibility by optimizing the interface for different screen sizes and devices.
- **Increased customer satisfaction** by delivering a visually striking and easy-to-use interface.

### Billing Software(CRUD)

Oct, 2023 - Oct, 2023

PHP

Laravel

MySQL

- **Streamlined financial management process** by implementing a billing software that simplifies invoice creation, client management, and product catalog, resulting in improved efficiency and accuracy.
- **Enhanced user experience** by developing a user-friendly interface for the billing software, promoting ease of use and reducing training time for new users.
- **Increased productivity** by automating invoice generation and client management tasks, freeing up time for employees to focus on more strategic initiatives.

- **Improved financial reporting** by integrating the billing software with existing financial systems, allowing for real-time reporting and analysis, enabling better decision-making.
- **Enhanced customer satisfaction** through the implementation of the billing software, resulting in faster billing cycles, improved accuracy, and more personalized service.

### Bike Service(CRUD)

Apr, 2023 - May, 2023

Java

Spring Boot

Hibernate

MySQL

- Developed a Bike Service Center Management System with CRUD operations **improving efficiency and productivity** of bike service center operations.
- Designed an intuitive user interface **enhancing the user experience** and making it easier for staff to manage bike service requests and track customer information.
- Implemented a secure login system **ensuring customer data privacy** and preventing unauthorized access to sensitive information.
- Integrated a payment gateway for online service payments **streamlining the billing process** and allowing customers to easily make payments from anywhere.
- Created detailed reports and analytics **providing valuable insights** on service center performance and customer preferences for informed decision making.
